PROFESSIONAL EXPERIENCE

SPOT N PASTE

React/Angular/Chrome Extension Developer

Yelm, WA

2021-Present

React and Angular developer adept in building and redesigning Chrome Extensions from the ground up. Specializes in automating tasks, scraping data from various websites, and comprehensively redesigning extensions, enhancing both user experience and efficiency

- Successfully migrated an existing Chrome extension to React, leading to a 55% increase in development efficiency and a 70% improvement in user interface
- Resolved storage limitations by transitioning from LocalStorage to IndexedDB, enhancing data handling capabilities and improving extension performance by 60%
- Optimized Angular application performance, achieving a 40% reduction in load times and a 30% decrease in memory usage
- Created reusable Angular components, enhancing code maintainability and reducing development time for new features by 30%
- Developed data scraping capabilities for various e-commerce dashboards including eBay, AutoDS, Walmart, and OAGenius, providing users with real-time pricing and stock information, resulting in a 25% increase in user efficiency and a 20% rise in extension usage frequency
- Added a one-click address pasting feature on checkout pages, significantly simplifying the order process for dropshippers and regular users, contributing to a 80% reduction in checkout time and a 40% increase in user satisfaction ratings
- Introduced an address book feature to save and quickly paste addresses during checkout, improving user efficiency by 40% and increasing extension adoption by 25%

CODE CRAFTERS

Front End/React Developer

New Jersey, NJ

2020-2021

Skilled React Developer with experience in building user-friendly web apps. Took part in hiring new team members, helped two co-workers improve their skills, and worked closely with back-end developers and designers. Known for being a good team player and making web apps that perform well and look great.

- Successfully transitioned the entire codebase from class components to functional components using React Hooks, enhancing code readability and maintainability, leading to a 30% improvement in component rendering speed
- Successfully integrated Context API for global state management, facilitating easier state access across components, which improved the app's performance by 20% and reduced prop drilling by 30%
- Expertly converted PSD designs to responsive and interactive HTML/CSS layouts within the React framework, ensuring pixel-perfect UI implementation, which contributed to a 25% increase in user interface responsiveness
- Implemented Lazy Loading for media and other heavy content, reducing initial page load times by 40% and enhancing user experience, especially on low-bandwidth connections
- Diligently addressed and resolved numerous support tickets, reducing user-reported issues by 35% and demonstrating strong problem-solving skills and commitment to user satisfaction
- Collaborated closely with backend developers to ensure seamless integration of front-end and back-end functionalities, improving overall application performance by 20%
- Integrated various third-party APIs, leading to a 15% increase in application functionality and a 20% boost in user engagement
- Implemented debouncing in API call functions to reduce the number of requests made during user input, resulting in a 50% decrease in unnecessary network traffic and enhanced application performance
